DETAILED ACTION

1. Claims 1-27 are pending.

Election/Restrictions

2. A telephone call was made to Peter Eng (650-320-4847) on 2/13/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7 are directed to a central trusted certificate authority, classified in class 713, subclass 156.
- II. Claims 8-27 are directed to a particular authentication technique having key exchange, classified in class 713, subclass 171.

4. Inventions I and II are related as sub combinations disclosed as usable together in a single combination. The sub combinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I and II have separate utility in that Group I has utility where a single authority or server performs the functions of confirming legitimacy; Group II has utility in a single sign-on environment where transmission and reception entities exchange information during authentication which establishes an operational key, not necessitating the use of a central authority. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2134

Applicant is advised that the reply to this requirement, to be complete, must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
